

Cash Flow Narrative FY24

Executive Summary:

- **Beginning cash balance is \$38,368,618**
- **Projected ending cash balance is \$36,061,755**
- **Projected ending cash balance includes \$4,210,000 restricted to the steam pipeline project**
- **The operating projected cash ending balance net of the restricted steam line fund is \$31,851,755.**
- **Projected ending cash estimate is \$36,061,755**

The statement of cash flows enables users of the financial statements to determine how well an entity's income generates cash and to predict the potential of an entity to generate cash in the future. The purpose of the cash flow forecast is to present cash inflows and outflows for a reporting period to the reader of the report. Cash flows are not readily apparent when just reviewing the income statement, especially when that document is created under the accrual basis of accounting. Accrual accounting requires that certain non-cash revenue and expense items be included in the income statement, potentially in substantial amounts.

We began FY2024 with a cash & investment balance of \$38.369M.

You will note this does not have a one-to-one relationship with the Management Report, this is due to two reasons. The Management Report looks at individual fund activity for Education & General, Auxiliaries, and Designated Operations & Service funds; while these funds are the main funds for the University, other funds exist as well (such as Capital, Grant and Agency funds). The Cash Flow forecast incorporates all cash & investments for the University other than the cash balance related to Perkins loans (\$677,058 as mandated) and the quasi endowment. Additionally, the Management Report shows accounting activity using accrual-based accounting. Accrual accounting creates timing differences between income statement accounts (revenues & expenses as shown on the Management Report) and cash. A revenue transaction may be recorded in a different fiscal year than the year the cash related to that revenue is received. One purpose of the statement of cash flows is that users of the financial statements can see the amount of cash inflows and outflows during a year in addition to the amount of revenue and expense shown on the income statement.

For FY2024, the cash flow projection is based on actuals through September then several assumptions including a flat enrollment revenue overall for the year, the Board approved tuition increases, a 5% increase in services & supplies (S&S). The Steam Line Project is included but noted below the cash flow since are restricted dollars and cannot be used for operations. Salary increases and Other Payroll Expenses (OPE) rate increases have been included as of what we understand currently. Overall, the cash flow projection shows a \$2.307M decrease.

We will continue to monitor and adjust monthly. Current financial conditions continue to put pressure on cash flow.

Data is based upon the accounting system information

Actual cash and investments on deposit at 07/01/24 is projected as \$36,061,755

Projected Ending Data excludes Restricted Cash for the Steam Line Project (\$4.21M)

Note: The positive amount in 2021-2022 is primarily related to the Federal stimulus funding received

Projected 7/1/2024 Balance is reduced by \$4.21M for Steam Line Project

Western Oregon University
