This is how SUBJ (the subject of the course) is consolidated into a Program (a cluster of faculty who offer subject-area courses).

Start with the schedule of courses, provided by the Registrar, one line for each CRN. Then take the following steps.

Zero-ed out credits excludes the CRN from the analysis. This is done with courses that would otherwise be double counted or are non-standard listings where course size does not make sense. This report counts courses and counts them only once.

These are the steps needed to transform schedule data in program-level average and median course size data.

Move all non-standard sections (beginning with letters) to the ALT spreadsheet

Zero out **credits** for MS, AS, ICS, NRS, NSE, PE (coaches), MUP, INTL

Consolidate enrollments for concurrent/crosslisted courses: Art Studio, MUEN, 400/500 slash, PSY/GERO 484, ANTH/CJ 322, 328, 443, 372, others?, PS/COM 416. This is tedious.

Zero out credits for non-dominant sections of above courses (I allocate enrollments to the largest section of the crosslisted course)

Zero out credits for Keulks Honors sections

Create a new variable for GR, UG-LD, UG-UD

Zero out credits for all internships, ranges, etc, teacher placements, clinical, practicums

Retain enrollments for 500-level Education courses, as appropriate
